

TRANSPORTATION SERVICES

ABOUT

AIS transportation department was formed since the day school started in 2007. We have upgraded our system to provide services that are highly reliable, secure, on-time, and safe.

AIS consists of a fleet of 3 busses and 7 vans with a seating capacity ranges from 14 passengers to 45 passengers. Our transportation allotted six different routes which cover the vicinity of 15 kilometers within the city in the most efficient manner. Our vehicles are maintained on a regular basis with proper inspection and registration.

For AIS, security is very important and safety issue is our topmost priority. Our drivers are highly trained and they have gone through a tough screening process. All the background and license checks are done before hiring. They receive specialized training in student behavior management, loading, and unloading, security, and emergency management procedures. They also do annual medical exams and driving record checks to keep their driving license with proper endorsement. On top of that, AIS conducts random substance abuse testing as well as drug tests to be extra conscious.

The AIS Student Transportation Services operates that meet and in some cases exceed federal and state laws to ensure that school buses are the safest mode of transportation for our school children. We are deeply committed to the safety of your child as well as all our community's children.

To register your child for the bus service, please contact Ms. Philo Rozario.

ROUTES

- City Line
