- Great News for A Level Students
Going back to school has been an unforgettable day for our students. They were excited to be attending their new classes. Especially the level seven students who would be beginning a division of science subjects such as biology, physics and chemistry.
The teachers and students warmly welcome the new scholars.

What lies ahead is bright with new possibilities and dreams waiting to be explored and fulfilled.

Play your part in this magical moment with your intellect.

But don't forget that others will help you through your journey too.
This is what Noha Adanan had to say.

What is your impression of the school as a newcomer?
I don’t feel that I am new, everyone in this school is friendly and I feel really comfortable.

What are your expectations?
I feel that I can full my expectations of what I want to be with the help of my teacher.

Ahamed Halim says that the most enjoyable part about Alnoor is meeting great people such as the teachers and students, and discovering the passion of learning as it is competitive.

What he likes the most is that he was given a warm welcome from classmates and that it has given him courage and confidence.

Rodana Royez says that she likes the school and she feels she could do well and fulfill her dreams.

The reason she chose this school is because it offers suitable and affordable courses.

“I am looking forward to do my best to achieve academic Excellence.”
The Principal and administrators have been busy over the holidays making arrangements and preparing for the 2015-2016 school year.

As they look and work for the beneficial of the students.
International AIS-KL is offering scholarships for the upcoming A levels September 2015 intake. Please refer to the school website for more information.

English
The management has decided to use Oxford International English which is more challenging. The materials in the books are recommended by the Cambridge International Examinations to support Cambridge Primary English Curriculum. The Student Book exposes students to a rich language from around the world.

Science
The division for science into Physics, Biology and Chemistry will begin from level 7. It will be an early preparation for the IGCSE examinations.

AIS-KL is offering scholarships for the upcoming A levels September 2015 intake. Please refer to the school website for more information.
